Professional Summary

I started my professional journey in front-end development with JavaScript and React.js, and later expanded my experience into Vue.js through real-world, team-based projects. I currently focus on front-end performance, AI-assisted development workflows, and building features around real business requirements, while deepening my knowledge of Next.js and front-end architecture.
My goal is to grow into a Front-End Engineer capable of building scalable, production-ready products.

Skills

Technical Skills: **JavaScript, TypeScript, React.js, Vue.js, Next.js, TanStack Query, Redux Toolkit, Pinia, REST APIs, GraphQL, Git, Tailwind CSS**

Soft Skills: Teamwork, Problem Solving, Effective Communication, Giving & Receiving Feedback, Active Learning, Accountability

Work Experiences

Front-End Developer — Mashhad | Hybrid

WikiQ — May 2026 – Aug 2026 | 4 months

- Developed authentication and session management flows, including OTP authentication, token handling, and protection of sensitive routes.
- Implemented role- and permission-based UI to control access to menus, routes, and user actions.
- Developed the API integration layer using tRPC and TanStack Query, including queries, mutations, caching, and cache invalidation.
- Built complex, reusable forms with React Hook Form and Zod, including validation and server-side error handling.
- Developed search, filtering, pagination, and infinite scrolling with URL-synchronized state and server-driven data.
- Developed multi-step workflows for exam creation, package management, and other business-rule-driven processes.
- Implemented cart synchronization between local state and server-side data to keep the shopping cart consistent across the application.
- Built reusable components and responsive layouts for shared use across different product pages and user flows.
- Implemented SEO-related features including schema.org structured data with JSON-LD, dynamic sitemaps, and SEO-friendly routes.
- **Technologies:** Next.js, React, TypeScript, tRPC, TanStack Query, React Hook Form, Zod, Tailwind CSS, JSON-LD, SEO

Front-End Developer — Mashhad | On-Site

Faraham Digital Marketing Agency — Nov 2025 – Mar 2026 | 5 months

- Developed employee, branch, and manager management modules for a human resources administration panel using Vue.js and TypeScript.
- Implemented role- and permission-based UI and managed user access levels with Pinia.
- Built complex create and edit forms using Vee Validate and Yup, including schema-based validation and input error handling.
- Developed and maintained API integrations with Axios and Vue Query, managing server state across multiple application modules.
- Developed new features and improved existing parts of the Khorasan Razavi Elevator Union project using feature-based and module-based project structures.
- Collaborated with the Back-End team and participated directly in client requirement sessions to translate business needs into implementable product features.
- **Technologies:** Vue.js, TypeScript, Vuetify, Vue Query, Pinia, Vee Validate, Axios, Yup

Training

Turbo Front Program

Part Software Group — Sep 2025 – Oct 2025 | 1 months

- Developed an authentication flow and integrated the application with a real Back-End API.
- Managed application state and implemented part of the business logic using Pinia.
- Implemented route guards and application routing with Vue Router.
- **Technologies:** Sass, Vue.js, Pinia, Vue Router, Axios, Vee Validate

Education

Sajjad University of Mashhad

Associate Degree in Computer Engineering (Software) — Oct 2024 – Present
